

IN THE TITLE:

Please rewrite the title as follows:

-- TRANSMITTING AND RECEIVING A SIGNAL OF A PICTURE INCLUDING  
RELATED INFORMATION--

IN THE CLAIMS:

As shown below, please rewrite claims 1, 4, 5, 7, and 8, and add new claims 9 and 10.

*Sub B1*  
Please rewrite claims 1, 4, 5, 7, and 8 as follows:

--1. (Amended) A transmitting method comprising steps of:

*A*  
multiplexing a signal of a picture including a selectable object, with information relevant to the selectable object in the picture, with a visible symbol to which reference is made when selecting the selectable object, being presented in the picture correspondingly to the selectable object, wherein said selectable object is displayed at a position in the picture indicated in a predetermined address included in the relevant information of the selectable object; and

transmitting the multiplexed picture signal;

the relevant information being displayed by selecting the selectable object referring to the symbol.--

*Sub B1*  
--4. (Amended) The method as set forth in Claim 1, wherein:

*#2*  
one or more channels carrying information relevant to the selectable object are used for the signal of the picture including the selectable object; and

~~A2~~  
the information channels are selected by entering, by select keys of an input means, a symbol of a channel number with which reference is made to the channels.--

~~B1~~  
--5. (Amended) The method as set forth in Claim 1, wherein the address indicates a start point of a picture data zooming by which within a picture, another picture is gradually zoomed in.--

~~A3~~  
--7. (Amended) A receiver for receiving a picture signal of a picture multiplexed with information relevant to a selectable object included in the picture and presenting in the picture a visible symbol corresponding to the selectable object, the apparatus comprising:

~~B1~~  
means for displaying the picture of the received picture signal including at least one selectable object;

an input means for receiving the symbol corresponding to a selected object; and means for controlling the displaying means to display the information relevant to the selected object correspondingly to the symbol received by the input means,

wherein said selected object is displayed at a position in the picture according to a predetermined address included in said information relevant to said selected object.--

--8. (Amended) A receiving method of receiving a picture signal of a picture multiplexed with information relevant to a selectable object in the picture and presenting in the picture a visible symbol corresponding to the selectable object, the method comprising steps of:

displaying the picture of the received picture signal including at least one selectable object;

*Ak*  
*B1*

receiving a symbol corresponding to a selected object; and  
controlling displaying to display the information relevant to the selected object  
correspondingly to the received symbol,  
wherein said selected object is displayed at a position in the picture according to a  
predetermined address included in said information relevant to said selected object.--

---

Please add new claims 9 and 10 as follows:

- Ak*  
*B1*
- 9. (New) The receiver as set forth in Claim 7, wherein said address indicates a start point of a picture data zooming.--
- 10. (New) The method as set forth in Claim 8, wherein said address indicates a start point of a picture data zooming.--
- 

#### REMARKS

Favorable reconsideration of the application is respectfully requested in light of the amendments and remarks herein.

By this amendment, claims 1, 4, 5, 7, and 8 have been amended, and new claims 9 and 10 have been added. Upon entry of this amendment, claims 1-10 will be pending.

#### Objections to the Specification

In Section 1 of the Office Action, the Examiner has objected to the Title. As noted above, the title has been amended, thereby obviating this objection. Accordingly, it is respectfully requested that this objection be withdrawn.
